

What is the energy transition in Poland?

Wholesale energy prices in Poland compared to other EU countries remain very high, and the economy's dependence on imported fossil fuels is growing rapidly. In the latest, seventh edition of the "Energy Transition in Poland" report, Forum Energii presents the state of transition play and a broader look at the overall process.

Why is energy production increasing in Poland?

At the same time, energy production from natural gas increased, by more than 40%. This is a result of falling fuel prices and the flexibility of gas generation. Wholesale energy prices in Poland compared to other EU countries remain very high, and the economy's dependence on imported fossil fuels is growing rapidly.

What type of energy is used in Poland?

Renewable energy here is the sum of hydropower, wind, solar, geothermal, modern biomass and wave and tidal energy. Traditional biomass - the burning of charcoal, crop waste, and other organic matter - is not included. This can be an important energy source in lower-income settings. Poland: How much of the country's energy comes from nuclear power?

How much energy has been cut in Poland this year?

From January to mid-May this year, the curtailment affected more than 400 GWh of energy. That's as much as nearly half a million households consumed in that period", said Marcin Dusiński, senior analyst at Forum Energii and the author of the report "Energy Transition in Poland".

How much money does Poland spend on energy?

Last year alone, Poland spent PLN 138 billion (i.e., slightly less than on defence). Over the past decade, taking inflation into account, the cost of fuel imports has already exceeded PLN 1.2 trillion. Energy driver needed right away The energy transition in Poland has no helmsman.

What happened in Poland's energy transition in 2023?

Poland's energy transition is progressing, and 2023 was a year of real records. Although coal remains the main source of electricity production, its share in the mix fell to an all-time low of 60.5%, down 10 p.p. from a year earlier. Production from RES reached 27% for the first time.

BTI Energy is an Engineering, Procurement, and Construction (EPC) company that focuses on Solar PV systems. We are committed to installing solar power systems to save energy and contribute to reducing carbon emissions. We provide effective, efficient solutions that meet the standards for solar system installations, and we can also offer ...
