

Can durapower build a battery factory in Poland?

Durapower, partners to kickstart a new battery manufacturing plant in Europe. Image by: Durapower. Singapore-based energy storage solutions provider Durapower and Polish firms Pozbud (WSE:POZ) and Elmodis intend to form a joint venture (JV) to build a factory for producing up to 2 GWh of batteries per year in Poland.

What is the strategic partnership between durapower & pozbud?

The strategic partnership, which takes the form of a Memorandum Of Understanding, formalises the mutual interaction and strengthens the existing relationship between Durapower, Pozbud and Elmodis at both the strategic and working level, focusing on the manufacturing and delivery of Lithium-Ion Batteries for use in containerised ESS systems.

Why is durapower partnering with European energy companies?

Durapower CEO Kelvin Lim said: "This partnership cements our commitment to giving energy companies in the European Union an alternative to renewable energy sourcing, providing localised supply chain of lithium-ion batteries and high-quality after-sales experience while driving towards a goal of a net-zero carbon footprint."

What will durapower's European expansion plan entail?

Durapower expects the flagship European Union-based plant to contribute towards a significant share of its European growth expansion plan. The planned joint venture will allow the working group to kickstart the production and assembly of modules and racks, eventually leading to localise Durapower's European battery cell sourcing and manufacturing.

What are Poland's first unsubsidized PV projects?

The 65MW Witnica project is among Poland's first unsubsidized PV projects. Image: BayWa r.e. The Polish PV market has boomed in recent years, but there were not so many corporate and utility solar/wind PPAs, given the competition with the auction system. However, exorbitant energy prices last year have changed the equation.

Will Qair Polska build a photovoltaic farm in Zimnodol?

Wrocław, February 15, 2024 - Qair Polska has secured financing for the fourth large-scale photovoltaic farm in the municipality of Zimnodol. Construction will commence in the second quarter of 2024, with debt financing provided by a PLN 77 million loan from PFR Investment Fund FIZAN ("PFR").

As a result, although Poland's solar capacity has more than doubled in the last three years, only 30 of the EU's 9,000 energy communities are located in Poland [1]. Poland's installed solar capacity surged to over 17 GW in 2023, making it the fourth-largest solar market in the European Union with over 1.3 million micro solar
