

Portugal elgam energy

Does Portugal have a high level of electrification?

Portugal has a high level of electrification. In 2019, electricity covered 25% of the total final energy demand, 56% of building energy demand, and 25% of industry energy demand, according to IEA. A significant portion of the electricity in Portugal is produced through a renewable source, over 50%.

What is Portugal's energy transformation?

Portugal's transformation is more than just about energy production; it's a narrative of resilience, innovation, and community spirit. As the country forges ahead, its commitment to renewable energy serves as a powerful reminder that a brighter, greener future is possible, and it begins with each of us.

How much energy does Portugal generate from renewables?

Portugal generated an 'historic' 95 per cent of its electricity from renewables in April, according to the network operator REN. Renewable energy generation averaged just below that for the first four months of the year, covering 91 per cent of the nation's power needs.

How does Portugal produce electricity?

Portugal mostly uses hydroelectricity and wind to produce electricity, with wind power being the largest. However, Portugal is still heavily dependent on imported coal for electricity production. Still, Portugal agreed to close all coal facilities by 2030. There is no nuclear energy production in Portugal.

Is biomass a source of electricity in Portugal?

Traditional biomass - the burning of charcoal, crop waste, and other organic matter - is not included. This can be an important source in lower-income settings. Portugal: How much of the country's electricity comes from nuclear power?

Why is Portugal so dependent on imported energy?

Portugal ranks as the 11th EU member state most dependent on imported energy sources, with a decreasing dependence since 2000, when 85% of its energy was imported. This is mainly due to the lack of fossil energy sources, which continues to impact the total consumption of primary energy significantly.
