How much solar power does Portugal have?

The Cerca photovoltaic plant begins operation, delivering the renewable capacity assigned to EDP Renewables in Portugal's first solar energy auction. The project has a 202 MWp capacity, sufficient to power nearly 100,000 households. EDP now owns 540 MWp of solar capacity in Portugal, a technology crucial for the country's energy transition.

How much solar power does EDP have in Portugal?

The project has a 202 MWp capacity, sufficient to power nearly 100,000 households. EDP now owns 540 MWp of solar capacity in Portugal, a technology crucial for the country's energy transition. This milestone was achieved with the commissioning of EDP Renewables' largest solar plant in Europe, located in the Lisbon district.

Is solar a good option for Portugal?

Solar is well suited to support Portugal's National Energy and Climate Plan's 2030 targets due to its scalability, short deployment cycles and having the lowest electricity generation costs in history. It is a cost-effective solution to meet the urgent need of rising energy demand through local and low-carbon solutions.

What is the largest solar power plant in Portugal?

On 9 October 2021, the largest solar power plant in Portugal was inaugurated in Alcoutim. With an installed capacity of 219 MW, the power plant has 661,500 solar panels and can power the needs of 200,000 homes. It occupies an area of 320 hectares and will prevent the emission of 326,000 tons of carbon dioxide every year.

What is EDP Renewables doing in Portugal?

EDP Renewables has activated 202 MW of solar capacity in Portugal. The plant, in the district of Lisbon, was awarded to the company in the country's inaugural solar energy auction. It is the company's largest solar facility in Europe thus far.

How much solar power will Portugal have by 2030?

Portugal has set a goal of between 8.1 GW and 9.9 GW in installed capacity by 2030. The Serpa solar power plant is an 11 megawatt plant covered 150 acres (0.61 km<sup>2</sup>) and employs 52,000 PV panels. The panels are raised 2 meters off the ground thus allowing grazing to continue.

Solar is well suited to support Portugal's National Energy and Climate Plan's 2030 targets due to its scalability, short deployment cycles and having the lowest electricity generation costs in history.

EDP Renováveis was founded in 2007 with the objective of managing, operating and investing in the renewable assets portfolio of the EDP group - Energias de Portugal - based in Lisbon. Today EDPR manages
