An uninterruptible power supply (UPS), also known as a battery backup, provides backup power when your regular power source fails or voltage drops to an unacceptable level. A UPS allows for the safe, orderly shutdown of a computer and connected equipment. The size and design of a UPS determine how long it will supply power.

Battery backup - A simple, robust option for using clean energy to keep a building powered during power outage.; Self-supply - Obtain energy independence by storing excess solar energy for later use; Time-of-Use - Store off-peak grid power for use when utilities charge the highest rates.; Demand charge curtailment - Reduce the demand charge for businesses

We are one of the best UPS battery suppliers in Qatar that provides VRLA, Gel, and Lithium packs from trusted brands that guarantee high performance. Comparatively, partial-home battery backup systems usually store around 10 to 15 kWh. Given that power outages are infrequent in most parts of the country, a partial-home battery backup system is generally all you'll need. But, if your utility isn't always reliable for power, whole-home battery backup may be the way to go.

Our full range of Uninterruptible and enhanced Power Supply system's cover backup power needs for your enterprise, manufacturing units, IT infrastructure, for each and every set up and hyper scale data centers.

Many standby generator options in the \$2,000 to \$7,000 range can power a standard American home. But the average generator cost, including installation, is \$9,000. By comparison, a 10 kilowatt-hour (kWh) home backup battery costs about \$8,000 after incentives. If you want whole-home power, you'll probably need more storage than that, though.

APC by Schneider Electric, formerly known as American Power Conversion Corporation, is a manufacturer of uninterruptible power supplies(UPS), electronics peripherals and data center products. APC Smart-UPS is a line of smaller units intended for home and office use, available as floor-standing and rackmount versions.
