Why did we install solar & battery storage systems on Christmas Island?

Christmas Island - home to the greatest migration of red crabs in the world, and an island that is almost all national park. We installed solar and battery storage systems at two sites on Christmas Island for Parks Australia to provide clean power to their main headquarters and research field station.

What is a home backup battery?

A home backup battery provides a safety net when you need to protect your family against a power loss. It delivers clean power, unlike a home standby generator that relies on fossil fuels. With battery backup solutions, you get energy security and peace of mind.

How does a home power backup work?

Hardware: In addition to the battery itself, home power backups require balance-of-system (BOS) components, wiring, an inverter, and several small pieces of installation hardware. Labor: Battery installations are typically performed in less than a day, and a licensed electrician is usually required for your system to be interconnected to the grid.

How does a whole-home battery backup system work?

Operation: Standard whole-home battery backup systems offer comprehensive, long-term power continuity, functioning like whole-house UPS. They are capable of providing electricity to your entire home for an extended duration during outages like a whole house UPS.

Are whole house battery backup systems a good idea?

Whole house battery backup systems offer uninterrupted power and grid independence, but they may require significant initial investment and could become less efficient over time. Generators with battery backup systems are reliable and powerful, but they involve ongoing fuel and maintenance costs.

Why are home battery backup systems important?
