

Do you need planning permission to install solar panels on your roof?

An increasing number of people are investing in solar energy. More and more homes are having solar panels, or solar tiles, installed on their roofs. Of course, with such installations, the topic of planning permission and building regulations often comes to the surface.

Can you put solar panels on a building?

Yes, if the installation falls under permitted development. However, if you live in a conservation area or world heritage site you can't put solar panels on the principal or side elevation walls of your house if it fronts a highway. This would require a planning application. Are there restrictions for solar panels on a listed building?

How to install solar panels?

Make space for the solar panel accessories (solar inverter, cables and solar batteries, if desired), for instance in a plant room 4. Plan a day for installation 5. Erect the scaffolding (this can be done by your supplier or by a company you organise) 6. The solar panel mounts will be installed 7. The professionals will install the solar panels 8.

Can solar panels be installed without planning permission?

Solar panels need to receive ample sunlight throughout the day and where possible should not be obstructed by shading from trees or other buildings. Most residential properties in the UK can have solar panels installed without planning permission as they are considered to be a 'permitted development'. The exceptions are:
