

What is energy in Liechtenstein?

Energy in Liechtenstein describes energy production, consumption and import in Liechtenstein. Liechtenstein has no domestic sources of fossil fuels and relies on imports of gas and fuels. The country is also a net importer of electricity.

What percentage of Liechtenstein's electricity comes from non-renewable sources?

In 2016, non-renewable sources accounted for 67,35 % and renewable sources for 32,47 % of Liechtenstein's electricity supply. Energy production from non-renewables consisted of 56,88 % foreign imports of electricity produced by nuclear power, and 0,65 % of electricity produced in Liechtenstein from imported natural gas.

Is Liechtenstein a solar power station?

Samina Power Station, currently the largest of the domestic power stations, has been operational since December 1949. In 2011-2015, it underwent a reconstruction that converted it into a pumped-storage hydroelectric power station. In recent decades, renewable energy efforts in Liechtenstein have also branched out into solar energy production.

Is biomass a source of electricity in Liechtenstein?

Traditional biomass - the burning of charcoal, crop waste, and other organic matter - is not included. This can be an important source in lower-income settings. Liechtenstein: How much of the country's electricity comes from nuclear power? Nuclear power - alongside renewables - is a low-carbon source of electricity.

Does Liechtenstein use fossil fuels?

Liechtenstein has no domestic sources of fossil fuels and relies on imports of gas and fuels. The country is also a net importer of electricity. In 2016, its domestic energy production covered only slightly under a quarter of the country's electric supply, roughly 24,21 %.

How much electricity does Liechtenstein use?

In 2010, total consumption of electricity in the Principality of Liechtenstein amounted to roughly 350,645 MWh. In 2015, total consumption of electricity in the Principality of Liechtenstein amounted to roughly 393.6 million kWh.

Energy in Liechtenstein describes energy production, consumption and import in Liechtenstein. Liechtenstein has no domestic sources of fossil fuels and relies on imports of gas and fuels. The country is also a net importer of electricity.

renewable energy in different countries and areas. The IRENA statistics team would welcome comments and feedback on its structure and content, which can be sent to statistics@irena. Last updated on: 31 July, 2024

Liechtenstein: Many of us want an overview of how much energy our country consumes, where it comes from, and if we're making progress on decarbonizing our energy mix. This page provides the data for your chosen country across all of the key metrics on this topic.
