Where is SEG solar located?

SEG Solar (SEG) and PT Kawasan Industri Terpadu Batang (KITB), announced that they have entered into a binding agreement for the lease of approximately 41 hectares of land located in the Batang Regency, Central Java, Indonesia for a term of 80 years.

Will SEG solar build a 5GW vertically integrated PV plant in Indonesia?

Image: SEG Solar. Solar manufacturer SEG Solar has signed a land utilisation agreement to build a 5GW vertically integrated PV manufacturing plant in Indonesia. Construction of the plant will be carried in several phases.

Will SEG invest \$500 million in a solar plant in Indonesia?

SEG plans to invest \$500 million to establish a 5GW solar cell production facility and a 3GW solar module manufacturing facility. The project aims to boost Indonesia's involvement in the global renewable energy supply chain and create over 2,000 jobs.

When will SEG solar start production in Indonesia?

The plant is expected to start production by the end of 2024. Updated on 17 May to add the technology used in Indonesia and update the status of the US module assembly plant. SEG Solar has signed a land utilisation agreement to build a 5GW vertically integrated PV manufacturing plant in Indonesia.

What will SEG Solar do in Indonesia?

A spokesperson at SEG Solar told PV Tech the primary focus would be on tunnel oxide passivated contact (TOPCon) technology for the plant in Indonesia, and it might consider heterojunction in the future. Once fully operational, the project's total capacity will be 5GW of annual nameplate production capacity from wafers to modules.

Who is SEG solar?

Founded in 2016, SEG is a leading vertically integrated PV manufacturer headquartered in Houston, Texas, USA and is dedicated to delivering reliable and cost-effective solar panels to the utility, commercial, and residential markets. SEG will have more than 5.5GW of global module production capacity in 2024.
