

Pure energy renewables Lesotho

What is renewable Lesotho?

Renewable Lesotho brings together a toolbox of instruments, including: Infrastructure development: supporting a pipeline of projects ranging from off-grid solutions, mini-grids, solar home systems, to potential larger investments in hydro-, solar, including floating solar, wind energy, and transmission.

What are the potential energy resources in Lesotho?

Potential grid and off-grid renewable energy resources in Lesotho include hydro power, solar and wind energy. Biomass can also be considered where the material can be transformed to produce electricity either through direct combustion or via biogas. Hydro and pumped Storage

Who is constructing a solar power plant in Lesotho?

The government has also engaged China Sinoma International Engineering and TBEA Xinjiang New Energy to construct solar power plant that will produce 70 MW. Lesotho Electricity and Water Authority (LEWA) Lesotho Electricity Company (LEC) Lesotho Highlands Development Authority (LHDA)

How can Lesotho improve electricity access?

Increase electricity access to households, schools and enterprises in Lesotho. -Provide reliable and affordable electricity through renewable energy sources to Basotho. -Provide training on entrepreneurship and productive uses of electricity for vulnerable women and underserved rural communities.

Can Lesotho become an energy exporter?

Energy independence /Lesotho can meet its own energy needs and potentially become an exporter of clean energy, setting an example for the entire region, and reducing its current energy import bill.

How much hydropower does Lesotho generate?

Currently, Lesotho generates 72 megawatts of hydropower through the 'Muela Hydropower plant, which does not satisfy domestic demand. The country will generate 80 MW following the construction of the Polihali Dam expected to be completed in 2028. There is potential, and there are plans, to expand hydropower capacity and establish wind farms.
