

Why did the Dominican Republic build a photovoltaic plant?

The energy deficit and dependence on fossil fuels drove the Dominican Republic to step up its commitment to clean energy. DOMINION took on the task of building the photovoltaic plant in this Caribbean country, with an offer that included everything from the design and construction of the plant to its operation and subsequent maintenance.

What is the future of photovoltaic energy in the Dominican Republic?

Finally, the future perspectives of photovoltaic energy in the country are presented, based on current studies of projects that could be installed in the near future. It is estimated that the Dominican Republic could exceed 1.5 GW installed by 2030.

Is the Dominican Republic dependent on fossil fuels?

dependence on fossil fuels. 3. The Dominican Republic's national policy on renewable energy based on Law 57-07 still has aspects to improve. 4. The installed capacity of photovoltaic energy in the Dominican Republic is 0.43 GW.

In the Dominican Republic, the National Energy Commission (CNE) has granted the definitive concession to three contracts for the installation of solar parks located in different regions of the...
