The PWA requirements will have a significant impact on the financing available for clean energy projects due to the fivefold increase in credits at stake. Most clean energy projects are modeled with an expected rate of return incorporating tax credits at a rate that assumes the PWA requirements are met.

PWA ENERGY SOLUTION generators will eliminate CO², decrease the cost of electricity by 80% and will removethe need and costs of transmission. Our plan is to produce power where and when is it needed in the home, office, factories, or villages.

With a very diverse background in the development of power infrastructure starting with the electrical distribution utility of Aley in 1924, followed by the initiation of a 70MW wind farm with Hawa Akkar; In 2010, Arina energy combines strong technical expertise with business acumen to provide sustainable solutions to customers.

To reach its 50% green energy target by 2030, Lebanon must build around 6 GW of wind and solar plants. By exploiting Lebanon's potential for clean pumped hydro-storage, integrating battery storage or selling our excess electricity to Syria, Lebanon could reach such objectives faster and integrate more renewables into its energy sourcing.
