

What is the energy transition in French Guiana?

The Energy Transition for green growth. Reflecting France's international climate (compared to 1990) in 2030. Another important planning (Programmation pluriannuelle de l'énergie, PPE) . the security of supply. French Guiana has its own pluriannual energy programming.

How much energy savings does QTM deliver?

“With zero capital outlay from the client, QTM delivers energy savings of USD 800k in one year for the world's fifth tallest residential tower.”

What is French Guiana doing to improve energy access?

Reflecting France's international climate (compared to 1990) in 2030. Another important planning (Programmation pluriannuelle de l'énergie, PPE) . the security of supply. French Guiana has its own pluriannual energy programming. deployment to improve energy access.

How much CO2 does French Guiana produce?

In 2011, CO2 emissions in French Guiana relative to the electricity production was estimated at 360 GCO2/kWh which was four times higher than Metropolitan France (Figure 3). The lack of access to energy in the inland areas is a key issue at the heart of French Guiana's pluriannual energy programming.

Is French Guiana a country based on fossil fuels?

French Guiana as a French overseas territory is heavily dependent on imported fossil fuels. It is a two-tier society where there is a large gap between the coastal and the inland areas concerning energy access. Compared to the coastline, the household electrification rate in the rural areas remains lower.

What are the benefits of QTM?

“With zero capital outlay from the client, QTM delivers energy savings of USD 800k in one year for the world's fifth tallest residential tower.” Engineer financial and environmental objectives structured so that we accept the financial risk, not the client.

Provide energy efficient equipment, retrofits, renewables, and energy management systems with limited financial risk and, in majority of contracts, zero capital requirement from our clients. Our energy specialists take the time to ...

In 2021, French Guiana's electricity consumption demonstrated a strong emphasis on low-carbon sources, with about 70% of its electricity generated from clean energy. This includes more than half of its electricity derived from hydropower, which makes up the backbone of the region's low-carbon generation.

developing areas. Energy self-sufficiency has been defined as total primary energy production divided by total

primary energy supply. Energy trade includes all commodities in Chapter 27 of the Harmonised System (HS). Capacity utilisation is calculated as annual generation divided by year-end capacity x 8,760h/year. Avoided

The lack of access to energy in the inland areas is a key issue at the heart of French Guiana's pluriannual energy programming. With an electrification rate of dwellings four times lower...

This paper aims to make an inventory of the energy situation in French Guiana, identify the challenges restricting the widespread use of renewable energy and propose some recommendations...

This paper aims to make an inventory of the energy situation in French Guiana, identify the challenges restricting the widespread use of renewable energy and propose some recommendations towards a sustainable development.

Provide energy efficient equipment, retrofits, renewables, and energy management systems with limited financial risk and, in majority of contracts, zero capital requirement from our clients. Our energy specialists take the time to understand your needs, tailor a ...

In French Guiana, a community of indigenous Kali'na began actively resisting plans for the world's first baseload renewable power plant using hydrogen technology - the CEOG project - in ...

QTM provides flexible funding to deliver renewable and energy efficient infrastructure. Why We Do It As companies become accountable for their environmental impact, they require funding, engineering and technology.
