Reflect Orbital is a company focused on delivering sunlight to Earth after dark using a network of in-space reflectors. They aim to capture and utilize solar energy, which is vastly abundant, to support sustainable energy solutions on Earth.

Ethiopia's history stretches back millennia, with the country being home to some of the oldest evidence of human ancestors. It holds the distinction of being the only African country to resist European colonisation successfully, maintaining its independence throughout the 19th and 20th centuries. This unique history has shaped Ethiopia's strong ...

In a world where Stanford startups increasingly churn out iterations of food delivery apps and poorly disguised duplicates of ChatGPT, original thinking and boundless ambition are rare traits. However, these traits are at the core of Reflect Orbital, an energy startup with a mission so audacious it borders on science

This California-based (of course) startup aims to sell sunlight and energy at night by sending a giant mirror into space, aboard a satellite that can direct the mirror to reflect sunlight onto a ...
