

Why is energy a problem in Chad?

This precarious energy situation hinders socio-economic development and affects quality of life, especially in Chad's second largest city, Abéché. With 80,000 inhabitants, Abéché is not connected to the national grid and has struggled to develop its infrastructure due to security challenges.

Will Chad's first solar power plant be built in Abéché?

In this unfavourable context, the French renewable energy firm InnoVentis is developing Chad's first solar power plant in Abéché. The pilot phase of the plant (1 MW) was built between mid-2020 and November 2021, with soldiers providing security for both personnel and equipment.

Does Chad have an off-grid power system?

The government of Chad, which currently supplies just 4% of its population with electricity, continues to explore off-grid solutions to power its 14 million population.

Overall, the Djermaya Solar Project yields a significant role in the alleviation of poverty across Chad, on both a small and large scale. Not only does Chad's renewable energy project maintain its climate commitments under the Paris Agreement, but, crucially, it offers a solution to the destitute poverty suffered by millions of Chadians.

At Ren, we believe it is our collective responsibility to collaborate in building a better world for future generations. We harness the power of spreading good energy, not only through our daily interactions but also through the renewable energy projects we champion.

developing areas. Energy self-sufficiency has been defined as total primary energy production divided by total primary energy supply. Energy trade includes all commodities in Chapter 27 of the Harmonised System (HS). Capacity utilisation is calculated as annual generation divided by year-end capacity x 8,760h/year. Avoided

## Ren energy Chad

On the heels of Ren Energy's seven-year anniversary, I am thrilled to announce that we have joined Cascale as an official member. This has been a long time coming. The core mission of ...

Chad has made significant strides in its climate change initiatives, particularly in emission reduction and the promotion of renewable energy. One notable success story is the implementation of the Chad Solar Energy Project, which has successfully harnessed solar power to provide electricity to rural communities.

Ren Energy's tech-enabled consulting services designed for renewables planning and procurement at scale can also be leveraged across the corporate value chain--for scope 2 emissions. ? Renewables Contract Tracking. Ren Energy has expanded to serve the world's most climate-conscious companies with renewables contract tracking.
