

What does the Department of energy do in Lesotho?

The Department of Energy is committed to increasing energy access and ensuring security of energy supply in the country. The Department of Energy is tasked with promotion and implementation of renewable energy projects and programs. A website of the Department of Energy (DoE) in Lesotho with an Energy Management Information System (EMIS).

Can Lesotho produce 450 MW of hydropower?

According to Lesotho's Department of Energy, Lesotho could potentially produce 450 MW in hydropower and several hundred more with wind power. However, only 17 percent of this potential is being exploited, 96 percent of it at the Muela hydro-power plant and the rest from mini hydro-power plants at Mants'onyane, Mokhotlong, Tsoelike, and Semonkong.

Is Ren*energy scalable?

production is highly scalable relative to peers, and sits in top quartile of the global RNG cost curve. ESG Certified, REN*energy's RE: 360; process effectively reduces waste and produces negative carbon intensity (CI) by recycling methane emitted from waste streams, using it to produce a renewable energy.

How does Ren*energy reduce waste & produce negative carbon intensity?

ESG Certified, REN*energy's RE: 360; process effectively reduces waste and produces negative carbon intensity (CI) by recycling methane emitted from waste streams, using it to produce a renewable energy. In 2018, Canada's managed forests emitted 243 Mt of CO₂, largely in part due to wildfires; 20% more than the entire Canadian energy sector.

What is Lesotho energy policy 2015-2025?

Lesotho Energy Policy 2015-2025 is a framework policy that sets out the strategic direction of the country's energy sector developments. It is aligned to the Vision 2020 and the NSDP and promotes development of environmentally cleaner renewable energy and increasing its share in the country's energy mix.

What is Ren*energy?

REN*energy's integrated technology and partner platform enables high volume & low cost production of renewable natural gas. has strategically assembled a fully integrated business model to fuel a long project pipeline with secured supply agreements.

Some of the first outcomes of a project aiming at mapping the renewable energy potential in Lesotho are hereby presented. In particular, the present paper deals with the task of the project ...
