

Renewable energy companies Iceland

Iceland boasts a 100% reliance on renewable energy. But it hasn't always been that way. We take a look at how the island nation turned its power situation around and find out how some off-the-grid innovations are paving their way to a greener future.

Experience how we create our green energy. In our Geothermal Exhibition you experience first-hand how green, sustainable energy is produced at one of the largest single-site geothermal power plant on the planet, Hellisheiði ON Power plant. We are located in a stunning setting surrounded by lava and moss.

Renewable energy provided almost 100% of electricity production, with about 73% coming from hydropower and 27% from geothermal power. Most of the hydropower plants are owned by Landsvirkjun (the National Power Company) which is the main supplier of electricity in Iceland.

Iceland is a world leader in renewable energy. 100% of the electricity in Iceland's electricity grid is produced from renewable resources. [1] In terms of total energy supply, 85% of the total primary energy supply in Iceland is derived from ...

The Iceland Renewable Energy Cluster (IREC) serves as the unifying platform for the entire energy industry in Iceland, bringing together public and private entities and institutions across the full value chain. Our mission is to enhance the competitiveness of our members, the industry, and Icelandic society as a whole.
