

Requirements for installing photovoltaic panels on rooftops

Do you need planning permission to install solar panels on your roof?

An increasing number of people are investing in solar energy. More and more homes are having solar panels, or solar tiles, installed on their roofs. Of course, with such installations, the topic of planning permission and building regulations often comes to the surface.

Can you install solar panels on your roof?

Homes and businesses will be able to install rooftop solar panels more easily, under new rules announced today. Changes to permitted development rights rules will mean more homeowners and businesses will be able to install solar panels on their roofs without going through the planning system.

Will homeowners be able to install rooftop solar panels more easily?

Homeowners will be able to install rooftop solar panels more easily without costly planning delays. This was published under the 2022 to 2024 Sunak Conservative government. Homes and businesses will be able to install rooftop solar panels more easily, under new rules announced today.

Can I install solar panels if I don't meet building regulations?

Your local authority can also apply for a Confiscation Order to take away any money you've earned with your system - so there's absolutely no benefit to installing solar panels that don't meet building regulations. It's crucial that your solar installation follows all building regulations.

When will solar panels be mandatory?

In March 2024, the European Parliament approved a law requiring solar panels on all new residential buildings by 2030. The EU Solar Standard makes it mandatory for member states to gradually include solar installations in new public, commercial, and residential buildings.

Are solar panels a legal requirement for new homes?

Even though installing solar panels on new builds is a great way to set new homes up with renewable energy from day one, it's not yet a legal requirement. One common problem is that developers don't use all the available roof space, resulting in a less effective solar panel system.

3. Make space for the solar panel accessories (solar inverter, cables and solar batteries, if desired), for instance in a plant room. 4. Plan a day for installation. 5. Erect the scaffolding (this can be done by your supplier or by ...
