

Russia is rich not only in oil, gas and coal, but also in wind, hydro, geothermal, biomass and solar energy - the resources of renewable energy. However, fossil fuels dominate Russia's current energy mix, while its abundant and diverse renewable energy resources play little role.

Weakening investor interest in clean energy is due to elusive targets, high costs and lack of financing, according to Igor Sechin, boss of Russia's biggest oil producer Rosneft and a well-known ...

Weakening investor interest in clean energy is due to elusive targets, high costs and lack of financing, according to Igor Sechin, boss of Russia's biggest oil producer Rosneft ...

For almost 40 years Russia has cooperated with Europe in the field of environment and energy, and Russian Northwest region has been a forerunner in that. These existing transnational networks, institutions and norms have a positive influence on the development of sustainable energy in Russia.

RePowerEU supports the green transition and limits EU dependence on Russian fossil fuels by reducing energy waste, producing clean energy, ... secure and sustainable energy for Europe. ... This initiative pools gas demand from EU and Energy Community companies and matches this demand with competitive supply offers from the global market ...

The government of Russia has set goals for enhancing the country's energy efficiency over the next decade or so, with much of the focus being on the development of sustainable energy initiatives. The effort involves the participation of a number of private companies, some directly involved in research and development of energy alternatives ...

As an industry, energy (oil and gas) has accounted for an average of 18.1% of Russia's overall GDP between 2017 and 2020, 10 making it one of the country's most important industries. Source: Federal State Statistics Service of Russia (Rostat) Why is taking a hard stance on Russia critical as an energy company?

The purpose of the study is to identify the main factors that affect the efficiency of major oil and gas companies. We have set the following tasks to achieve this goal: (1) to determine the specifics of Russian oil and gas companies in comparison with global trends in the oil and gas industry and to provide further recommendations to companies; (2) to perform an ...

Renewable energy in Russia mainly consists of hydroelectric energy. Russia is rich not only in oil, gas and coal, but also in wind, hydro, geothermal, biomass and solar energy - the resources of renewable energy. Practically all regions have at least one or two forms of renewable energy that are commercially exploitable, while some regions ...

The “Russia-Africa: Sustainable Energy Development” session was held on October 12 at Russian Energy Week 2022. Industry experts discussed a number of promising projects on the African continent, the promotion of which contributes to achieving the UN Sustainable Development Goal 7 - universal access to affordable, reliable, sustainable and ...

remaining 30% In the same year, renewable energy's share in Russia's total final energy consumption (TFEC) was 3.6%. By the end of 2015, total installed renewable power generation capacity reached 53.5 gigawatts (GW), representing about 20% of Russia's total installed power generation capacity (253 GW) Hydropower

Many larger rated Russian companies are well placed to tackle immediate environmental, social, and governance (ESG) challenges. Under pressure from international investors, they are flexing their ESG muscles beyond unambitious domestic regulations and aiming to capitalize on the new opportunities that ESG presents. The Russian government and ...

Russia would benefit from this for a number of reasons. Improving resource efficiency could lead to economy-wide benefits and bring about savings for capital expenditures, while improvements in energy efficiency could reduce carbon emissions and create opportunities for the Russian economy to increase productivity and competitiveness.

The purpose of this study is to identify the dynamics in the development of the RES sector in Russia and key energy companies in this industry. In this work, the author uses statistical research methods, including correlation, based on data from reports on development of alternative energy in Russia as well as comparative and institutional ...

The EBRD's Sustainable Energy Initiative (SEI) finances sustainable energy projects by combining investments with technical assistance and policy dialogue with stakeholders. Under the SEI, the EBRD has invested EUR2.4 billion in 102 projects in Russia, of which 20 projects worth EUR337 million were signed in 2012. The Bank

The Russian nuclear corporation Rosatom announced plans to build the battery factory in the spring and at the time had taken a 49 per cent stake in Enertech International, a South Korean manufacturer of electrodes, lithium-ion cells and energy storage systems. In March, the first stage of production was expected to begin in 2025, but now there ...

Global oil companies investing in the Russian energy industry, including BP, Shell and Total, reaffirmed March 26 their readiness to work with Russia on achieving net zero goals, adding they seeing ma

The Republic of Belarus (Belarus) is a landlocked country in Eastern Europe, bordered by the Russian Federation (Russia) to the north and east, Ukraine to the south, Poland to the west, and Lithuania and Latvia to the northwest. Belarus covers an area of 207 595 square kilometres (km²) (40% of which is forested) and has

9.4 million inhabitants. Minsk, the largest city, is the ...
