Can Reunion Island achieve energy autonomy by 2030?

Reunion Island,a French overseas region located in the Indian Ocean,is facing a three-fold challenge combining demographics,the environment and energy. To limit its heavy dependence on imported fossil fuels,Reunion Island aims to achieve energy autonomy by 2030based on greater energy efficiency and renewable energy alternatives.

Can Reunion Island make its electricity 100% renewable?

Reunion Island's plan for making its electricity system 100% renewableinvolved a multi-fold process. This ambition was established in the law " Grenelle 1" No. 2009-967, whereby the French Ministry of Ecology mandated in April 2009 that all new constructions in overseas departments must install solar water heating.

How did Reunion Island get its electricity?

Concluding discussion During the 1980s,Reunion Island's entire electricity supply came from renewable hydropower. As the population grew and quality of life improved,coal and oil were introduced to help meet increasing demand.

Can geothermal energy be developed on Reunion Island?

Geothermal energy also presents significant potential for development, with an installed capacity of 30MW; however, the main problem for this resource on Reunion Island is its location in a protected natural area.

What is green energy revolution Reunion Island?

Until recently, Reunion Island had implemented the GERRI project, Green Energy Revolution Reunion Island. This economic and social development program centered on the sustainable development of Reunion Island and resulted from the "Grenelle Environment" French environment roundtables.

Does Reunion Island use fossil fuels?

Whereas in the 1980s all of the energy produced on Reunion Island came from renewable hydroelectricity, the island has gradually become dependent on imported fossil fuels.

Découvrez avec Austral Groupe Energie des solutions haut de gamme en installations photovoltaïques et isolation écologique à la ouate de cellulose. Exclusif revendeur Solax Power, nous offrons des services sur mesure à la Réunion, à l"île Maurice et en France métropolitaine.

Solar thermal collectors and photovoltaic (PV) systems are already widespread in La Reunion. 70% of households are equipped with solar domestic hot water and PV represented approximately 25% of the total installed capacity of electricity ...

de la Réunion campus site (1998-2010) together with a de-scription of the current LIO3T system installed at the Maïdo Observatory. We show comparisons between the LIO3T O3 ...

The equatorial ionospheric current system is composed of equatorial electrojet (EEJ) and solar quiet (Sq) that flow in the eastward direction. That being mentioned, this study looked into the changes in ionospheric currents stemming from geomagnetic storm disturbances at different levels of solar activity during solar cycle 24. This analysis was performed by employing an EEJ ...

Coordonnée par l"Université de La Réunion, la collaboration regroupe 5 partenaires dont les meilleurs centres de recherche européens du domaine. L"objectif principal du projet TwInSolar est d"accé1érer la transition énergétique à La Réunion et dans d"autres territoires insulaires, grâce au renforcement de la communauté R& I ...
