

Safe energy limited Faroe Islands

Why is Sev the main power supplier in the Faroe Islands?

SEV is the main power supplier in the Faroe Islands. We operate on 17 of the 18 islands that constitute the Faroe Islands. Isolated in the North Atlantic Ocean, the Faroe Islands need to be self sufficient in terms of electricity generation as the Faroese electrical grid is not interconnected to neighbouring countries.

Who is responsible for the power supply in the Faroe Islands?

SEV is obliged to supply power to all citizens, companies and organisations 24-hours a day. SEV has sole responsibility for power quality and the power supply system in the Faroe Islands. The Faroe Islands are an isolated island society. The option of buying electricity from neighbouring countries does not exist.

How much electricity is renewable in the Faroe Islands?

In the Faroe Islands, more than 80% of the power for the main grid was renewable on 50 days in 2022. The municipality-owned company SEV is the main electricity supplier, providing approximately 90% of the total production, with private producers contributing the remaining percentage.

Can the Faroe Islands import or export electricity?

The Faroe Islands cannot import or export electricity since they are not connected by power lines with continental Europe. Per capita annual consumption of primary energy in the Faroe Islands was 67 MWh in 2011, almost 60% above the comparable consumption in continental Denmark.

Should the Faroe Islands be self-sufficient?

Isolated in the North Atlantic Ocean, the Faroe Islands need to be self sufficient in terms of electricity generation as the Faroese electrical grid is not interconnected to neighbouring countries. SEV operates six hydro power plants, three thermal power plants, three wind farms and one solar power plant.

How is energy produced in the Faroe Islands?

In the Faroe Islands, energy is produced primarily from hydro and wind power, with oil products being the main energy source. Mostly consumed by fishing vessels and sea transport.

ENERGY DISTRIBUTION. This app, developed by SEV, shows the energy distribution on the mainland. The mainland includes all islands except Fugloy, Mykines, Koltur, Skúvoy, Stóra Dímun and Suðuroy. The mainland accounts for approximately 90% of the electricity energy in the Faroe Islands. Electricity is produced by oil-, water- and wind energy.
