In recent weeks, residents across several communities in Saint Lucia have experienced power outages, causing frustration and inconvenience. The most recent outage occurred on Sunday due to a faulty generator at the Cul de Sac plant and the unavailability of another generator caused by mandatory maintenance.

Cul De Sac Power Station now has 87.4MW installed generation and 86.2MW of available generation capacity. With these newer and larger engines particularly those commissioned in the last few years, fuel efficiency is now at 19.4 units per gallon. The Cul De Sac Power Station feeds seven (7) substations across the island: CUL DE SAC POWER STATION

The Caribbean Island of St. Lucia is known for its beautiful beaches, lush rainforests, and colorful coral reefs. But for some of the almost 200,000 people that live on the island, another incredible resource is affecting their daily lives -- the nearly 15,000 solar panels that are producing clean, reliable, electricity from the island's first utility-scale solar farm.
