

What is EnerBlu cogeneration?

Enerblu cogeneration is an Italian company that designs and directly produces a range of cogenerators that set new standards of reference in terms of performance and reliability, in order to guarantee energy savings and sustainability.

Who makes EnerBlu cogenerators?

Thanks to Costell's entry into the group, Enerblu is today the only Italian company with a complete range of cogenerators, from 6 kWe to 20 MWe with endothermic engine or turbine technology.

What makes EnerBlu a good cogenerator?

Enerblu designs in detail all its machines and directly produces all the heat exchangers that equip the cogeneration units, including water / exhaust gas exchangers, thus creating a product that fully meets the needs of the customer. Very rich is also the range of cogenerators for biogas plants fed by animal waste or landfill gas.

Can EnerBlu supply Tele-assisted cogeneration Islands?

Enerblu is able to supply complete and fully tele-assisted cogeneration islands remotely from our service, managing all the main thermal vectors such as hot, cold (air conditioning and refrigeration) and superheated water, steam, diathermic oil, hot air.

What type of gas does EnerBlu use?

Furthermore, Enerblu's cogeneration plants are able to operate using methane gas, LNG (liquefied natural gas), LPG, biogas/biomethane and now, thanks to the introduction of a new dedicated product range, also using hydrogen.

Where can EnerBlu be used?

Enerblu boasts applications in all product sectors, from agro-food to plastic companies, from dairy to mineral water, from hospitals to small private clinics, to the tertiary sector dedicated to hospitality (hotels, restaurants, nursing homes and colleges) or wellness (swimming pools and SPA).

Enerblu Cogeneration has as its objective to be a "partner" technological in the market of energy efficiency. With one of the most complete ranges of cogenerators in the market and with an "affiliative" approach, we offer our partners the maximum support possible starting from the audit phase passing through design, production, ...

Enerblu Srl | 2.292 follower su LinkedIn. Enerblu Cogeneration designs and constructs directly a range of cogenerators ideal for companies that want to invest in renewable energies. It sets new reference standards in terms of performance and reliability, to ensure energy savings and sustainability.

sostenibilità. La nostra gamma di cogeneratori parte dai 6 kWe fino ai 4 ...

Enerblu can additionally support its partners with: - design and technical support for sizing the correct equipment - a complete range of cogenerating sets powered by natural gas or biogas engines (from 20 up to 2,5MW)

Enerblu opera in modalità EPC (Engineering, Procurement and Construction) e si propone quale partner e referente unico per la costruzione dell'impianto e la gestione di tutti gli aspetti correlati alla sua realizzazione: dallo studio di fattibilità; all'osservazione dei vincoli normativi, dalla progettazione emessa in servizio alla proposta di qualificata assistenza post-vendita che ne ...

Enerblu designs and directly manufactures a range of CHP that set new reference standards in terms of performance and reliability, in order to ensure energy savings and sustainability. Our cogenerator production line ranges from the 20 kWe unit up to the 4 MWe one, fueled with natural gas (methane) or biogas.

Nei settori della cogenerazione, del biogas e del biometano, Enerblu si pone come uno dei leader di mercato per chi vuole migliorare la propria competitività, risparmiando energia e limitando le emissioni in ambiente.
