

Sandon New Energy Storage Project

How much government funding has been given to energy storage projects?

This was published under the 2022 to 2024 Sunak Conservative government. Over £32 million government funding has been awarded to UK projects developing cutting-edge innovative energy storage technologies that can help increase the resilience of the UK's electricity grid while also maximising value for money.

Could 20 GW of LDEs save the energy system £24 billion?

Analysis has found that deploying 20 GW of LDES could save the electricity system £24 billion between 2025 and 2050, reducing household energy bills as additional cheaper renewable energy would be available to meet demand at peak times, which would cut reliance on expensive natural gas.

What is the long duration energy storage Investment Support Scheme?

Long Duration Electricity Storage investment support scheme will boost investor confidence and unlock billions in funding for vital projects. The UK is a step closer to energy independence as the government launches a new scheme to help build energy storage infrastructure.

Can a 1MW energy storage plant outperform current battery technology?

An innovative energy storage project developed in Edinburgh has been awarded £9.4m by the UK government. Synchrostor plans to build a 1MW demonstration plant which will have the ability to charge, store and discharge energy for a period of 10 hours. The test facility has been designed to outperform current battery technology.

Can new energy storage technologies boost UK energy resilience?

However, new energy storage technologies can store excess energy to be used at a later point, so the energy can be used rather than wasted - meaning we can rely even more on renewable generation rather than fossil fuels, helping boost the UK's long-term energy resilience.

How can energy storage improve our energy resilience?

Accelerating renewables is key to boosting our energy resilience. Energy storage helps us get the full benefit of these renewables, improving efficiency and helping drive down costs in the long term.

Delivered by Invinity Energy Systems plc (AIM:IES), a leading global manufacturer of utility-grade energy storage, in partnership with Pivot Power, has been awarded over £700,000 funding for a feasibility study into the ...

Five projects based across the UK will benefit from a share of over £32 million in the second phase of the Longer Duration Energy Storage (LDES) competition, to develop technologies that can...
