Does Senegal have a battery energy storage project?

The national electric utility of Senegal, Senelec, has signed a 20-year CCA with Infinity Power for a battery energy storage project.

What is Senegal's energy policy?

The IEA's Energy Policy Review of Senegal 2023, published today, finds that energy is at the heart of Senegal's 2035 strategy for accelerating sustainable development and economic growth known as the Plan Sénégal 2035, or the Emerging Senegal Plan.

How has Senegal reformed its energy sector?

Since the launch of the Plan Sénégal 2035, Senegal has adopted reforms designed to attract foreign investment in its energy sector and boost participation from the private sector, while leveraging significant support from development finance institutions.

Is Senegal a good country for energy transitions?

Senegal is a strong advocate for just energy transitions. The country has already met the wind and solar targets it established for 2025 under its most recent Nationally Determined Contribution to the Paris Agreement, and it has joined the Global Methane Pledge to reduce the world's methane emissions 30% from 2020 levels by 2030.

When did Karpowership start supplying electricity in Senegal?

Operations commenced in Dakar in October 2019- only two months after the contract signing. In December 2021, an additional contract of 100 MW was signed. With an installed capacity of 335 MW, Karpowership has been supplying 20% of Senegal's total electricity demand.

Will Senegal become an oil and gas producer in 2024?

This partnership could mobilise up to EUR 2.5 billion to support Senegal's efforts to achieve universal energy access and strengthen a resilient, secure and sustainable energy system that fosters sustainable development and economic growth. In 2024, Senegal is expected to become an oil and gas producer.

Renewable, cleaner energy options is key to Senegal's drive to increase electricity access. Through Power Africa, the United States is providing technical assistance to help shape Senegal's...
