

What is the biggest industrial solar power plant in Serbia?

The biggest Industrial Rooftop Solar Power Plant in Serbia. The largest Industrial Solar Power Plant for self-consumption in Zabac. The first industrial solar power plant for energy management system and protection of the production process Power supply within the capital project of the gas pipeline that goes through Serbia.

How will Serbia implement the energy transition?

Serbia plans to build solar power plants, wind farms, and pumped-storage hydropower plants, but also gas-fired power plants, energy storage batteries, and hydrogen facilities, in order to implement the energy transition. Coal-fired power plants would be closed by 2050, but not before there is enough green power capacity to replace them.

What percentage of Serbia's electricity comes from coal?

Serbia's national power utility Electric Power of Serbia (EPS) produces nearly 70 percent of the country's electricity from coal and nearly 27% percent from hydropower, with approximately 4% coming from private developers in wind and solar energy. Serbia heavily subsidizes coal and electricity prices, inhibiting competition.

Does Serbia need a coal power plant?

The ministry believes that until full decarbonization and coal phaseout are achieved, the operation of coal power plants only makes sense if coal of required quality is used. In order to replace all of its coal-fired plants, with a combined installed capacity of 4,400 MW, Serbia needs to build 8,000-10,000 MW of wind, solar, and hydro power plants.

What is energy security of Serbia?

The document, titled Energy Security of Serbia, lists short-term and long-term solutions for all segments of the energy sector, aimed at achieving strategic goals such as energy security, the security of supply, the energy efficiency of buildings, a just energy transition, and decarbonization by 2050.

What is Serbia's energy investment plan?

The Ministry of Mining and Energy has announced a EUR15 billion investment plan for the electricity sector in next several years, expecting to reach more than 3 GW of renewable energy production plants. The main players and investors in the Serbian Energy Sector are:
