

Following the devastation caused by hurricanes Irma and Maria in 2017, the Government of Sint Maarten (GOSM) renewed its commitment to digital government reforms aimed at fundamentally transforming how government interacts with citizens and the private sector, while also building resilience in the delivery

The International Bank for Reconstruction and Development (Bank) has agreed to provide financing to Sint Maarten for the Project through the Hurricane Irma Reconstruction, Recovery and Resilience Trust Fund.

Given the special hazard nature of lithium-ion BESSs, special fire suppression systems are in order. Traditional fire suppression systems are often ineffective or inefficient. Take sprinkler systems, for example. While testing has demonstrated them to be effective in extinguishing a lithium-ion battery fire, there are still drawbacks to using them.

The Sint Maarten National Recovery Program Bureau (NRPB) (the Recipient) will implement the Sint Maarten Wastewater Management Project (the Project), with the involvement of the Ministry of Public Housing, Spatial Planning, Environment and Infrastructure (VROMI), as set out in the Grant Agreement.

Sint Maarten is particularly vulnerable to climate change and natural disasters, which periodically cause extreme disruption of the country's economic activities and ... (ESS 2) - Labour and working conditions. ESS2 recognizes the importance of employment creation and income generation in the pursuit of poverty reduction and inclusive ...

We are specialized in all types of M.E.P.F.S.C installations, such as ULV, Lighting, Fire Detection & Fire Sprinkler, Alarms Systems, Drainage and Clean Water, Access Control, CCTV, Data, Internet Systems, solar panels and much much more along with the continued process of maintenance that guarantees certification!

Many fire suppression systems are available for either special hazards or as an alternative to automatic sprinkler systems. The selection of which type to use depends on the hazard--local or total flooding; contents of the space; and building or site constraints.

Given the special hazard nature of lithium-ion BESSs, special fire suppression systems are in order. Traditional fire suppression systems are often ineffective or inefficient. Take sprinkler ...
