

What is lower 48 energy's Bess project?

Lower 48 Energy are proposing to develop a 200 MW, 2hr BESS on site alongside an existing wind turbine and close to existing farm buildings and existing substation. The 200 MW of BESS will consist of containerised Li-ion battery packs connected together through strings of inverters and transformers.

Who is lower 48 energy?

Lower 48 Energy combines diverse set of skills and experience in end to end Battery Energy Storage Systems development. Lower 48 Energy works closely with suppliers, investors, and counterparties on BESS projects, leveraging market, engineering, technical, commercial and development expertise.

Who owns lower 48 energy Bess?

LONDON - Dec. 13, 2023 - Castleton Commodities International LLC (CCI) announced today that a subsidiary has acquired a majority stake in Lower 48 Energy BESS Ltd. (L48 Energy), a company that originates, builds, owns and operates large-scale energy storage systems.

How much energy can a Bess project produce?

The BESS project would be able to store and supply 290,000 MWh of renewable electricity annually (which is equivalent of supplying 100,000 homes) and in the process displace ca. 77,000 metric tons of CO₂ from the atmosphere.

How does lower 48 energy engage with the community?

Lower 48 Energy are committed to engaging with the community and other stakeholders at the earliest stages of the project's development. In this way we will ensure that any disruption is kept to a minimum. To find out more about our engagement proposals please visit 'The Community'.

How will Bess work?

The 200 MW of BESS will consist of containerised Li-ion battery packs connected together through strings of inverters and transformers. All the transformer connections will be combined in a customer substation and fed to a grid transformer which will be interfaced to the SSE Transmission network.

Lower 48 Energy are proposing to develop a 200 MW, 2hr BESS on site alongside an existing wind turbine and close to existing farm buildings and existing substation. The 200 MW of BESS will consist of containerised Li-ion battery packs connected together through strings of inverters and transformers.

Lower 48 Energy BESS is a UK based business that operates across the Battery Energy Storage Systems (BESS) landscape. Our engineers study the entire National Grid and the local Distribution Network Operators grids to identify viable and advantageous locations to build battery assets. Once we have identified a location, we then work with our ...

Slovakia lower 48 energy bess ltd

Discover the Shrewsbury Energy Storage Project by Lower 48 Energy, a proposed Battery Energy Storage System (BESS) designed to stabilise the UK electricity grid as renewable energy sources replace traditional fuels. This project aims to store surplus energy generated by wind and solar farms, making it available during high-demand periods, helping to reduce electricity costs, and ...

Lower 48 Energy proposes a strategic 200 MW BESS development at Upper Greenfields, near the proposed Greens SSE Substation. This project, with containerized Li-ion batteries, aims to store excess renewable energy and stabilize the grid, supporting the UK's net zero goals and decarbonization targets.

About L48 Energy Lower 48 Energy BESS is a UK based end to end Battery Energy Storage Systems developer focusing on developing large scale, strategically located BESS assets. We are motivated to rapidly develop an operational portfolio that is of importance to the UK's electricity grid.

Lower 48 Energy BESS Ltd seeks to capitalise on the growing intraday supply and demand imbalances caused by the UK's ever increasing reliance on renewable energy by developing Battery Energy Storage Solutions to reach net zero carbon. Battery Energy Storage Systems (BESS) has emerged as one of the dominant solutions to increase grid system ...

Lower 48 Energy Upper Greenfields 1 BESS is an important project in our self originated pipeline. Lower 48 Energy Upper Greenfields 1 BESS is strategically located immediately adjacent to the National Grid New Deer 2 Substation. New Deer 2 400 kV Substation forms part of ScotWind and is the onshore landing substation of Offshore wind generation ...

Discover the L48 Lytham Battery Energy Storage System (BESS) by Lower 48 Energy, designed to stabilise the UK grid and maximise renewable energy use. Learn how our strategic BESS projects support the transition to net zero by 2050 and enhance grid reliability with sustainable energy solutions.

L48 Upper Greenfields I BESS. L48 Upper Greenfields II BESS. news. Careers. Contact. NEWS. Lower 48 Energy has secured exclusivity rights to develop the Barton BESS. About Author. Blair has over 20 years" experience in the construction industry, specialising in leading complex programmes across multiple asset classes.

Battery Energy Storage Systems (BESS) has emerged as one of the dominant solutions to increase grid system flexibility, due ...

Based in the UK, L48 Energy is an independent pure-play battery energy storage (BESS) "originator to operator" and aims to develop, build and own grid-scale batteries at crucial locations in the UK, with possible expansion into other European markets.

BESS is a Green Generation Enabler, whose presence in the market place enables energy storage at times of the day when there is an excess of capacity and lack of demand. The presence of BESS on the Grid will alleviate curtailment & the associated cost.
