The Smart Energy Pathways methodology aims to meet people's energy needs and be compatible with environmental sustainability; promoting diverse, modern and renewable energy technologies at scale. SEPs promote participatory governance that includes all stakeholders involved in the energy decision-makers process.

Leapfrogging the need for traditional power stations, Kaï now has a decentralised grid that has created local jobs, and produces clean, affordable energy. Cutting-edge smart grid features, provided by SteamaCo, help Africa GreenTec to regulate power use, and to provide energy as cheaply as possible by encouraging consumers to prioritise energy ...

Highly skilled in the development of control & automation systems and software, Smart Energy engineers offer services and products well suited to the needs of organizations to help them succeed in their digital transformations and integrations.

One such mine is the Fekola gold mine located in southwest Mali, approximately 500km west of the capital Bamako and close to the border with Senegal. Hybrid Energy System. For a solution, the off-grid Fekola mine, owned by Canadian public gold producer B2Gold Corp., turned to Wärtsilä Energy, Suntrace and BayWa r.e. for a hybrid set-up.
