Now, the island runs on a completely renewable microgrid that meets 100% of residents' energy needs through solar power and battery storage. In 2016, the founders of Maui, Hawaii-based company Mana Pacific helped ...

American Samoa faces similar climate and energy resilience challenges as other Pacific islands: geographic remoteness, dependence on imported fossil fuels, and increased vulnerability to natural hazards like earthquakes, cyclones, and tsunamis. 1

Now, the island runs on a completely renewable microgrid that meets 100% of residents' energy needs through solar power and battery storage. In 2016, the founders of Maui, Hawaii-based company Mana Pacific helped design and implement Ta'u's solar-energy microgrid composed of over 5,300 solar panels.

The stability and affordability of power from the new Ta'u microgrid, operated by American Samoa Power Authority, provides energy independence for the nearly 600 residents of Ta'u. The ...

Now, instead of burning through 300 gallons of imported diesel fuel every day, the island's homes and businesses are almost entirely powered by solar+storage. The 1.4-megawatt PV and 6-megawatt-hour storage system developed by SolarCity can power the entire island for 3 days without sunlight and fully recharge in seven hours, ending the ...

Ta'u, a small island in American Samoa, now gathers enough solar energy for 24/7 power, thanks to a microgrid project completed in November with solar provider SolarCity and Tesla. The system, operated by American Samoa ...

The island of Ta'u in American Samoa, located more than 4,000 miles from the West Coast of the United States, now hosts a solar power and battery storage-enabled microgrid that can supply nearly 100 percent of the island's power needs from renewable energy.

\$70,715 grant to help American Samoa's Ta'u island operate on 100% renewable energy. This grant helps fund the replacement of a smaller diesel-powered emergency backup generator. The entire system includes solar photovoltaic panels and battery storage. What is this project? EPA's Pacific Southwest Region provided a grant to the

Ta'u, a small island in American Samoa, now gathers enough solar energy for 24/7 power, thanks to a microgrid project completed in November with solar provider SolarCity and Tesla. The system, operated by American Samoa Power Authority, comprises 5,000 SolarCity solar panels and 60 Tesla Powerpack battery-storage systems.

Smart group solar American Samoa

The stability and affordability of power from the new Ta'u microgrid, operated by American Samoa Power Authority, provides energy independence for the nearly 600 residents of Ta'u. The battery system also allows the island to use stored solar energy at night, meaning renewable energy is available for use around the clock.

The island of Ta'u in American Samoa, more than 4,000 miles from the United States' West Coast, now hosts a solar power and battery storage-enabled microgrid that can supply nearly 100 per ...
