

Smart solar storage Cyprus

An environmental impact assessment (EIA) has been submitted for a renewable energy project combining solar PV and energy storage on the Mediterranean island nation of Cyprus. The project would combine 72MW of solar PV with a 41MW/82MWh lithium-ion battery energy storage system (BESS), making it the largest to-date of either technology type.

While Cyprus aims to boost renewable energy to 33% of its grid by 2030, up from 19% currently, challenges such as limited storage and an ageing infrastructure hinder rapid progress. The government is preparing to address this by launching tenders for solar battery storage facilities in the coming weeks.

Smart Solar Cyprus is your all-inclusive solar partner, managing every detail from A to Z. We take the hassle out of going solar by handling all procurement, permits, documentation, and paperwork. Our rapid, professional service is matched only by our commitment to the latest and best products on the market.

Elevate your home with Smart Solar Cyprus and start seeing returns on your investment in as little as three years. Harness the abundant Cyprus sun and let it work for you, cutting costs and supporting the environment. Our efficient solar solutions mean quick savings and lasting benefits.
