What is Bess & how does it work?

The company said its BESS projects would allow the safe integration of renewable energy to the national grid. BESS can be used to bridge the energy security gap by storing excess energy when it is available, and releasing it when demand is high.

Is smgp a shareholder of UPSI?

SMGP, as shareholder of UPSI, has also entered into relevant agreements as sponsor and shares security grantor of its subsidiary in the project financing. SMGP is eyeing to complete one of the largest integrated battery storage networks in the world - a total of 32 battery storage stations, which will have a combined capacity of 1,000 megawatts.

Was smgp profitable in 2022?

SMGP remained profitable in 2022 despite the rise of coal and other fuel prices to unprecedented levels. The company posted consolidated revenues of P221.4 billion and EBITDA of P42.32 billion last year, which were both at par with results in prior years.

The BESS project is expected to set the stage for further investments in renewable energy and energy storage solutions. As Malawi embarks on this transformative journey, the hope is that such initiatives will unlock the country's potential, empowering businesses and communities alike.
