

Sol energy group Bangladesh

Quite simply, the firm has uses solar appliances, in Bangladesh's case, Solar Home Systems which have been distributed widely earlier, to create nano grids with 15-30 connected households where they can share excess power their system's produce.

Bangladesh-based off-grid solar energy firm SOLshare was named a 2020 Global Cleantech 100 company by Cleantech Group for the second consecutive time as the first company from Bangladesh ever.

Within Bangladesh's renewable energy mix, solar energy makes up for 39.5% of the total share and has been stated as the fastest growing renewable energy sector in the country. Bangladesh also has the largest off-grid program in the ...

SOLshare is a leading climate-tech company located in the heart of Bangladesh. Founded in 2014-2015, we provide cutting-edge technology and services and offer scalable solutions through our globally recognized service platform - the SOLbazaar.

SOLshare created the world's first peer-to-peer energy exchange network of rural households and small businesses with rooftop solar home systems. This enabled a more efficient distribution of electricity across the rural communities, access to higher loads, and first-time access on the go for the poorest segment of a village population.

Quite simply, the firm has uses solar appliances, in Bangladesh's case, Solar Home Systems which have been distributed widely earlier, to create nano grids with 15-30 connected households where they can ...

Bangladesh-based off-grid solar energy firm SOLshare has closed a \$1.66 million Series A round to bring the world's first peer-to-peer solar electricity trading platform to rural communities.

SOLshare has successfully piloted the world's first ICT-enabled peer-to-peer electricity trading network for rural households with and without solar home systems in Shariatpur, Bangladesh. Along with its implementation partner, the NGO UBOMUS, its financing partner IDCOL and research partner United International Universit-Centre for Energy ...
