

Sol systems Aruba

Who does Sol systems work with?

Sol Systems works with a wide range of customers across the renewable energy industry, from Fortune 500 companies looking for large-scale energy solutions to residential customers looking to monetize their incentives. Looking for something else?

How do I sign up for Sol Systems?

To sign up for Sol Systems, they'll work directly with your installer or financier to register your system. They'll handle any necessary regulatory measures and ensure your solar panel system is accurately reporting production numbers for SREC generation. Once the setup process is complete, your system will start generating sellable SRECs.

Does Sol Systems offer onsite and offsite electricity solutions?

Sol Systems offers onsite and offsite electricity solutions to customers through power purchase agreements (PPAs) tailored to their energy and sustainability needs with the ability to include community impact investment.

How does Sol Systems get paid for solar panels?

Sol Systems may offer their "Sol Upfront" option, under which they pay you a one-time, lump-sum payment for your SRECs. This payment equals the size of your solar panel system in kilowatts (kW) multiplied by their current rate for your state.

Is there a commission fee for Sol Systems?

For Sol Systems' services, you may have to pay a commission fee depending on the contact option you choose. However, if you opt into a fixed-pricing or lump-sum arrangement, you will not have to pay a commission fee.

19 Followers, 2 Following, 10 Posts - Sol Systems (@sol_systems_llc) on Instagram: "A solar energy company working to accelerate an equitable transition to a sustainable energy future."

Today, Onyx Renewable Partners, LP (Onyx) and Sol Systems LLC (Sol) jointly announce an agreement for the purchase and sale of a 24 megawatt (MWdc) solar and storage development portfolio that will provide clean, reliable power to businesses and communities across five states.

Ecosun Aruba works with the very highest quality materials. We only use well known and reputable brands for our panels and inverters. Furthermore, all our solar panels are certified for usage in salty and windy environments like we have on Aruba.
