

Solar Photovoltaic Panel After-sales

How many homes in the UK have solar panels?

More than 1.39 million homes in the UK have solar panels, as of June 2024, according to government data. Solar panels not only save you money, but they can also earn you cash, all while helping to reduce the planet's carbon footprint. And they'll still generate electricity on gloomy days, which the UK experiences a lot of.

Should you buy a solar PV system for your home?

Well-chosen solar panels can provide a reliable source of renewable electricity for decades, helping to slash your electricity bills and cut your carbon footprint. But buying an inappropriate solar PV system for your home could leave you out of pocket.

What are premium solar PV panels?

Premium solar PV panels are manufactured using only the highest-rated materials and are tested to ensure maximum performance. The innovative LID solution ensures that 8.33 panels will continue to operate at a minimum yield of 95% for 25 years.

How much does solar4good cost?

Solar4Good offers three domestic solar installation packages that can be customised and expanded according to your needs. Prices range between £5,500 and £6,000 for the cheapest package (10 solar panels) and go up to £9,000 and over for the most expensive one (16 panels and 8.7kWh battery storage).

Are solar panels worth it?

The investment in solar panels is worth it for the average UK home. For example, the typical 3-bedroom house in the UK is equipped with a 4kW solar panel system, enabling homeowners to potentially save around £600 annually on electricity expenses.

Is Project Solar a good company?
