What's new in solar energy in Tashkent?

Follow our news and stay up to date with our special offers and the latest trends in the use of solar energy in Tashkent and other regions of the country. A solar photovoltaic station with a capacity of 630 kW was launched on the territory of the Cabinet of Ministers of Uzbekistan in Tashkent.

What is the solar furnace of Uzbekistan?

The Solar Furnace of Uzbekistan was built in Uzbekistan and opened in 1981 as a part of a Soviet Union "Sun" Complex Research Facility, being the world largest concentrator. The rays are focused onto an area the size of a cooking pot and can reach 4,000 °C (7,230 °F), depending on the process installed; for example:

How much energy does Uzbekistan generate a year?

It is capable of generating more than 1.1 million kWh of electricity per year, the press service of the Ministry of Energy reported. It is planned to allocate \$1 billion for the introduction of renewable energy sources in the capital of Uzbekistan, the president said. Solar panels will be installed in buildings and other facilities.

How can Uzbekistan support its energy transition?

To support Uzbekistan's energy transition through the expansion of solar photovoltaic (PV) installed capacity.

More broadly, the solar plant aims to "achieve carbon neutrality of the power sector by 2050, as well as to make sure this development is consistent with the commitments made under the Paris Agreement", as explained by Nadita Parshad, Managing Director of the EBRD's Sustainable Infrastructure Group. "This is an investment in local economic ...
