

Are solar panels a good investment in France?

As electricity prices continue to soar in France - up 60% in four years - more people are turning towards solar panel kits, which promise to help users save on energy costs and installation prices. The estimated extra cost of electricity in 2024, compared to 2020, is EUR540 per household per year.

How much does a ground-mounted solar project cost in France?

Broadly speaking, for ground-mounted solar projects located in mainland France, the FIT will be reduced from EUR 570 per MWh to EUR 30 per MWh. The minimum FIT will be in the range of EUR 18 to EUR 50 per MWh, and the average FIT will be around EUR 30 per MWh.

Will France be able to develop solar power in 2023?

Several legal routes have been activated by the French government to accelerate the expansion and development of solar power in France. France is currently on course to miss its target to commission 20.1GW of solar power by late 2023.

Can I resell surplus solar panels in France?

If your letter still goes unanswered you can make an official complaint to Sollen, France's national energy ombudsman after two months. It has a page dedicated to issues with reselling surplus solar panel energy here.

Are French solar installations bolstered by a new law?

Beyond falling prices, the IEA PVPS report said solar installations were bolstered by the measures introduced in the French government's Law for the Acceleration of Renewable Energies which came into force in 2023. A requirement that competitive tender winners share some of the added value with locals.

Why is France launching a 'solar registry'?

In addition, the Act established a 'solar registry' to help identify 'acceleration zones', listing the development potential of available roofs and car parks that could have solar panels added to them by local authorities. France is currently on course to miss its target to commission 20.1GW of solar power by late 2023.

Paris, December 18, 2023 - Since 2019, EDF Renewables has signed long-term contracts in France for 600 MW for the production of low-carbon electricity from its onshore wind farms and ...
