

# Solar energy storage system export

Do solar panels have a Smart Export Guarantee (SEG)?

The good news for solar panel owners is that large energy companies are obliged to pay for the excess energy that is exported, under the Smart Export Guarantee (SEG) scheme. What is the Smart Export Guarantee?

How much do solar panels cost to export?

Find out which energy companies have the best rates. The amount you can get paid for exporting energy from your solar panels varies from a paltry 1p to as much as 40p per kWh. That means that if you've got solar panels, choosing the best export tariff could earn you hundreds of pounds extra in payments every year.

Can solar energy be exported back into the National Grid?

But that excess energy can be used elsewhere, by exporting it back into the National Grid, which then distributes it to wherever it is needed. The good news for solar panel owners is that large energy companies are obliged to pay for the excess energy that is exported, under the Smart Export Guarantee (SEG) scheme.

What are the best export tariffs for solar panels?

This tariff stands out in SEG tariff comparisons as one of the best export tariffs for solar panel owners. For example, by taking advantage of the SEG on top of the savings provided by a 4kW solar system with a 5.5p tariff rate alone, you can save up to £830 per year.

Does OVO offer a Smart Export Guarantee (SEG) tariff?

OVO Energy, a prominent UK energy supplier, offers an exclusive Smart Export Guarantee (SEG) tariff for customers with solar panels. This tariff provides a rate of 20p per kWh for electricity exported back to the grid, allowing OVO members with eligible solar PV systems to save up to £740 annually on their energy bills.

How do I export electricity to SEG?

Your property must have a valid Energy Performance Certificate (EPC) rating of D or above. Once these conditions are met, you can apply for a special export tariff with an SEG licensee, who will then pay you for any excess electricity you generate and export back to the grid.

The amount you can get paid for exporting energy from your solar panels varies from a paltry 1p to as much as 40p per kWh. That means that if you've got solar panels, choosing the best export tariff could earn you ...

While solar battery storage is optional, it's a wise investment if you want to be able to store your solar panel's excess energy once the sun goes down. It's not a particularly expensive addition ...
