

Does Brunei have a sustainable future?

Brunei is targeting 30% renewable energy in total power generation mix by 2035, with 200 MWp of solar energy by 2025. The launch event also saw the release of Hengyi's 2023 ESG Report, which highlights their progress in environmental sustainability, social responsibility, and governance.

Can a solar farm be developed in Brunei?

The new solar farms may be developed through public-private partnerships as the ministry seeks to reduce the government's financial burden. Brunei has set a target of generating 100 MW of solar energy by 2025 as part of the government's initiative to slash greenhouse gas emissions by 20 percent over the next 10 years.

What are the major solar installations in Brunei?

Major active solar installations in Brunei include the country's first, Tenaga Suria Brunei, launched in 2010 with a capacity of 1.2 MWp, and Brunei Shell Petroleum's 3.3 MWp solar plant, launched in 2021 to supply power to its headquarters. Both plants have plans for further expansion.

Who owns the solar plant in Brunei?

The solar plant in Brunei is currently operated and maintained by BSP. Agnete Johnsgaard-Lewis, BSP Managing Director and Shell Country Chair in Brunei, shared this information.

How will solar power power Hengyi's refinery & petrochemical complex?

This will be achieved through the installation of solar photovoltaic (PV) panels on building rooftops, car shed rooftops, and open spaces across 36 hectares of PMB. The project is designed primarily to provide energy to Hengyi's refinery and petrochemical complex.

Net metering is a programme that allows residential and commercial customers who generate electricity from Solar Photovoltaic (PV) system to sell excess electricity back to the national grid. ... The Ministry welcomes any interested visitors to tour the Tenaga Suria Brunei, the first and currently the only On-Grid Solar Photovoltaic (PV) Power ...

3. Absence of buy-back or feed-in-tariff (FiT) scheme. There are generally two ways to utilise solar energy for home owners. First is by consuming the electrical generation for your own use and the second is to pump it back into the grid, i.e., to sell it to your electricity provider or in Brunei's context, to the government.
