

Solar generator parkside South Sudan

Why is solar energy important in South Sudan?

As characterised by ample sunshine with strong solar power potential, South Sudan remains as one of key destinations on African continent for solar energy investment. In addition to this, it has been documented that evolution of solar PV is of great significance in South Sudan.

How long does solar energy last in South Sudan?

Proponents of solar energy argue that a solar system can produce reliable electricity for about 25 years. Having recognised solar energy potential, South Sudan is expected to put more emphasis on development of solar energy sector as part of its fight against energy poverty and economic diversification.

How solar energy can transform South Sudan's economy?

A solar energy can also be transformative to South Sudan's economy. For example, solar energy is affordable, cleaner and last longer as compared to energy from diesel-powered generators because generators need diesel to burn and they also need to be replaced after few years.

With support from Creating Hope in Conflict, a Humanitarian Grand Challenge, EarthSpark helped SunGate take a critical step towards addressing this challenge by launching South Sudan's first solar microgrid in ...

Aptech Africa's 26MWp solar installation in Juba, South Sudan, alleviates energy demand issues, reduces costs, and benefits over 525,000 residents, hospitals, schools, and businesses, while also mitigating CO2 ...

This solar power plant is a grid-connected system integrated with 30MW of diesel generators and has been completed in two phases, each phase with 13MWp. All the panels have been ground-mounted appropriately ...
