Is Guatemala a good place to invest in solar energy?

Guatemala is the second largest Central American power market, with a goal to increase renewable energy use. Relatively high levels of solar irradiance and large areas of cleared land give the country a strong potential for increased solar energy development.

How many solar plants are there in Guatemala?

Currently, it has the two largest solar plants in Guatemala, Horus I and Horus II, that combined have a total capacity of 110 MW. These provide the country with over 200 GWh of completely clean and renewable energy. Large scale clean and renewable photovoltaic solar energy generation.

Why did BMR decide to buy a solar farm in Guatemala?

As part of its evaluation process, BMR determined that the solar farm offered a strong return that was supported by Guatemala's well-established and stable regulatory system. BMR navigated a complex and cooperative sales process that involved four owners across three legal jurisdictions.

Grupo Onyx, through its Horus Energy brand, has established itself as a leader in Guatemala for the next generation of solar photovoltaic energy. Currently, it has the two largest solar plants in Guatemala, Horus I and Horus II, that combined have a total capacity of 110 MW.

The San Patricio Renovables project will be the company's largest single-site solar project by capacity, and almost double the size of MPC's power generation portfolio in Latin America and...
