

Solar mems technologies New Caledonia

Solar MEMS is a Spanish technological-based company, specialized in Micro Electro Mechanical Systems technology (MEMS) and its application to the design and development of high accurate sun sensors for space and other high technology markets.

Solar MEMS Technologies is a technological-based company specialized in the development of Sun Sensors for space applications and other high technology industries. Our Sun Sensor on a Chip technology is based on MEMS (Micro-electro-mechanical-systems) fabrication processes to achieve highly integrated sensing structures at low cost for high ...

Solar MEMS Technologies is a company specializing in the development of sun sensors for space applications and other high-technology industries. Its sun sensor on a Chip technology is based on MEMS (Micro-electro-mechanical-systems) fabrication processes to achieve highly integrated sensing structures at low cost for highly accurate AOCS, sun ...

Solar MEMS Technologies is a technological-based company specialized in the development of Sun Sensors for space applications and other high technology industries. Our Sun Sensor on a Chip technology is based on MEMS (Micro ...

At SOLAR MEMS, we are committed to designing and developing state-of-the-art solar sun trackers and control systems. We offer a wide range of sun sensors, known as Industrial Sun Sensors (ISS), specifically designed to measure the incident angle of ...

Design and development of sun sensors for satellites: SSOC and nanoSSOC, for med and big satellites, and for nano-satellites (cubesats).TEST IN SPACE full service: it provides a unique opportunity to achieve in-orbit demonstration and validation of innovative devices for research or commercial purposes through a short schedule, straightforward approach and an economical ...

Solar MemS offers its Engineering and Consulting services Dedicated to space companies for tailored electronic and mechanical designs, including integration processes in small satellite platforms. Development and optimization of ADCS technologies

Solar MEMS Technologies S.L. is a technology-based company specialized in the Micro Electro Mechanical System technology (MEMS) and its application to the Space industry. It was created in 2009 as a spin-off of the School of Engineering, University of Seville (Spain).
