Who is Octopus Energy?

At Octopus Energy we're dedicated to pairing our unrivalled customer service with superior solar products. Find your perfect solar package, and with our support you'll be maximising on savings in no time. 440W DeepBlue 4.0 Pro PV solar panels

How much is a cosy octopus Solar System worth?

It's worth £190 per year for a household with a 4.4kWp system, a 5.2kWh battery, an annual consumption of 3,500kWh, and typical UK solar irradiance. When added to your Cosy Octopus savings, this should enable you to end each year with £390 more in your wallet.

Is cosy octopus a good solar system?

Cosy Octopus offers an off-peak rate three times per day - from 4am to 7am, 1pm to 4pm, and 10pm to 12am - that's around 50% cheaper than your region's Flexible Octopus rate. You should also consider Intelligent Octopus Flux as an option, especially if you have a solar panel system that's bigger than 5.2kWp.

How do I connect my generation of choice to Octopus?

The process of connecting your generation of choice (e.g. solar panels) is still fairly complex and involves us (your energy supplier), the DNO (distribution network operator) and your installer all playing their part. You apply for the Outgoing Octopus Tariff online

Which octopus flux is best?

If you have a solar & battery system and don't own an electric car, Intelligent Octopus Flux is definitely your best option - unless you have a heat pump. In that case, you may want to use Cosy Octopus, which provides three off-peak periods per day which you can use to heat your home cheaply.

What is Octopus go?

Octopus Go was the company's first electric vehicle tariff. It's still available to anyone who has an electric vehicle and charger, whereas Intelligent Octopus Go can only be used by households with specific models.

Hi all, We have just installed a solar array with battery storage and were intending to sign up for Octopus Go Faster, but Octopus are no longer offering this to customers who don't have an electric vehicle - which is a shame!

15p per kWh for every unit you export. Best for simplicity: get paid a flat rate when you generate more energy than you use. Currently paying a flat rate of 15p per kWh. Tip: For homes without a battery, your solar will prioritise your home demand and any extra will go to the grid. For homes with a battery, excess will go to your battery, once the battery is full, excess will be exported to ...

Solar octopus Togo

Octopus Flux is a beta product. Some things may not work the first time, and installations and processes may take longer than we'd like. Third party tech like In-home Displays won't always work, and on occasion data issues with smart meters can take significant time to fix or prevent things from working at all.

Octopus Energy España, S.L.U es una compañía inscrita en el Registro Mercantil de Valencia (España) con fecha 14 de marzo de 2019, al tomo 10642, folio 25, hoja V-186743, inscripción 1 y número de identificación fiscal B40563082.

Get More For Your Solar Export with Octopus Go And Octopus Outgoing Fixed. Combine the Octopus Go tariff with the Octopus Outgoing tariff to maximize your solar panel and EV benefits. With this simple yet powerful combination, enjoy an 8.5p per kWh off-peak import rate for 5 hours and a 15p per kWh export rate around the clock.

Octopus EV charging. As more and more UK drivers are adopting electric vehicles, efficient and cost-effective charging solutions are more essential than ever. With Octopus Energy's innovative EV charging tariffs, including the Intelligent Octopus Go tariff, EV owners can enjoy affordable home charging while supporting green energy initiatives.

Octopus Go is an electricity tariff with a bonkers cheap 8.5p/kWh rate for five hours every night (between 00.30 and 5.30am). It was designed with EV-angelists in mind, because those sweet five hours let drivers charge up while they're asleep, and keep fuel costs close to 2.6p per mile.

Intelligent Octopus Flux is the best Octopus tariff for solar panels, in most cases. This innovative tariff is a smart import and export tariff with peak and off-peak periods that's available to households with solar panels and ...

Our registered address is UK House, 5th Floor, 164-182 Oxford Street, London, W1D 1NN. Octopus Electric Vehicles ...

I have no solar or hub etc. just the wall box. What settings do I need to just charge between 0030-0430 every morning on the Octopus GO. I have tried different options but it either starts as soon as it is plugged in or doesn't stop after 4hrs. I have included a few pictures but I do have more of different screens. Thank you.

Your solar panels are not producing anything at night, so you will always pull kWh usage from the grid at that time as well as anytime your solar panels are not keeping up with your usage during the day. This means that you will most likely always have a bill with us. Your bill will reflect both the rates and the amount of excess energy you ...

Agile Octopus is a smart electricity import tariff that adjusts its rate every 30 minutes, in line with wholesale

Solar octopus Togo

price changes. So rather than setting fixed peak and off-peak rates, this tariff reflects the continually shifting nature of the electricity market.

Pairing the right smart home tech with the right smart tariffs can save a lot of money, cut your carbon impact, and help the world ditch fossil fuels faster. Over a million customers have now tried an Octopus smart tariff or service.

If you want to go ahead and you're happy with the Octopus solar quotation you pay a £500 fee and Octopus will book you in for a home survey. The £500 then comes off the balance of the Octopus solar installation at the end. Don't forget to quote my Octopus solar installation referral code 95460 which will get £100 taken off your quote.

Save over 80% on your electricity bills on one of our competitive smart tariffs with a solar and battery installation. We've covered some of the main questions about getting solar panels in this blog, as well as a little ...

Solar export tariffs can save you hundreds of pounds per year by paying for the excess solar electricity you send to the grid - but Intelligent Octopus Flux isn't just another export tariff. As well as paying the highest export rates in the country, it also allows you to lower your import costs, all while helping the grid to withstand peak ...

Intelligent Octopus Go with a solar & battery system. If you also have a solar panel system as well as an electric vehicle, you can take advantage of an export tariff alongside Intelligent Octopus Go. Your best choice is ...

What is Solar Sharing? Sometimes, rooftop solar panels soak up so much sunlight that you end up with more power than you need. When this happens, you can sell the excess energy back to the grid (through export tariffs like Outgoing Octopus).. Thanks to the clever thinking of some generous customers like Stuart, we've come up with a way to give Octopus customers the ...

Octopus has unveiled a new investment into Italy's rooftop solar sector, partnering with local solar developer Coralsun to build 150 MW of new solar projects. Octopus Energy plans to invest EUR1 ...

Solar octopus Togo

I recently got 7.8kwh of solar panels installed along with 8x 2.4kwh batteries, this happend on the 20th of this month, on the 22nd I moved over to Octopus Intelligent Go. Since then I've been charging batteries overnight on the cheap rate and running off solar + battery during the day.

** These figures are based on a home with a 4.4kWp system, a 5.2kWh battery, an annual consumption of 3,500kWh, and typical UK solar irradiance, which exports 34% of its solar electricity. Intelligent Octopus Flux and Octopus Flux also generate additional income by using electricity arbitrage - that is, charging from the grid at cheaper times ...

Octopus are currently fitting a Zappi charger for me (actually its over a month late at the moment because of a missing part). I was intending to go with Octopus Go. I have 5.6kw Solar and intend to add 7.2kwh of home battery. I currently have the Agile outgoing tariff which is quite good at the moment, but I suspect it will drop off as summer ...

Once we've received half-hourly readings from your smart meter, which takes up to 14 days, we'll send you an email inviting you to accept the terms and conditions of Octopus Go to complete your switch (which include allowing us to take half hourly readings from your meter and that Octopus Go is a beta product which means that some things may not work first time).

After the expansion, the Mohammed Bin Zayed solar plant in the town of Blitta in central Togo will have a total capacity of 70 MW and will be West Africa's largest solar park, according to AMEA Power. Once completed, ...
