

Solar panel new rate Turks and Caicos Islands

Where can solar power be installed in Turks & Caicos?

Solar-derived power is increasing in popularity, with many private installations visible throughout the country, especially on new Turks and Caicos villa projects. Several local companies specialize in both supply and installation of alternative energy systems. The FortisTCI electricity plant on Providenciales.

How much does electricity cost in Turks and Caicos?

The 2015 electricity rates in Turks and Caicos are \$0.29 per kilowatt-hour (kWh), slightly below the Caribbean regional average of \$0.33/kWh. Like many island nations, Turks and Caicos is almost 100% reliant on imported fossil fuel, leaving it vulnerable to global oil price fluctuations that have a direct impact on the cost of electricity.

Could ocean thermal energy help Turks and Caicos meet its peak demand?

Once wave and ocean thermal technologies are proven in the marketplace, ocean energy and ocean thermal energy conversion have potential as well. Abundant wind and solar resources, as well as the potential for other renewable sources could help Turks and Caicos meet or exceed its peak demand of 34.7 MW.

Who produces electricity in Turks & Caicos?

In the Turks and Caicos, all public electricity generation is run by Fortis TCI, a vertically integrated company that provides both power generation and distribution.

Does Turks and Caicos have a policy on energy efficiency?

Turks and Caicos has few policies related to energy efficiency and renewable energy. Historically, the territory has not implemented policy mechanisms to aid in the development of clean and energy-efficient technologies.

Who owns the electricity in South Caicos?

Separately, Atlantic Equipment and Power (AEP) acquired an exclusive license for South Caicos which is due to expire in 2036. For the Turks Islands of Grand Turk and Salt Cay, electricity generation was run by Turks and Caicos Utilities (TCU), a government-owned entity.
