# Solar panel storage system Isle of Man

With solar PV panels: instead of selling unused excess solar generated energy to the grid (at half price), it is stored in your battery system for self-consumption later, ideal when the sun has a break. Off-peak electricity: Manx Utilities offer half price off-peak electricity, your battery system can charge with half price electricity at night time, during the day the entire property can run ...

Home Battery Storage. ... go green promote clean energy technologies on The Isle of Man. Reduce your environmental impact, one carbon-footprint at a time. Save money and breathe cleaner Manx air by installing: Solar PV Panels, EV ...

A Battery System can make full use of the power generated by your solar panels, ensuring that any unused power is stored on site to be used later when needed. If your electricity is supplied with two rates (a day rate and cheaper night rate), the solar + battery combination ensures that peak rate electricity usage is kept to a minimum.

Proposals for the very first utility-scale solar farm on the Isle of Man have been released by designer Peel Cubico Renewables (PCR). The 26MW Billown Solar Farm in Malew, near Castletown, would certainly produce enough power to fulfill more than 5% of the Isle of Man's power demand, when functional in 2024.
