

Solar panels and inverter Aruba

Solar panels are made up of photovoltaic (PV) cells which convert sunlight into direct current (DC) electricity, during the day. The electricity is fed to an inverter which converts the electricity into grid-compatible AC power, (which is what is used in your home).

We have installed over 10,000 solar panels in Aruba since Mister Green was founded in 2016. We are proud to be the only company in Aruba that is fully focused on our customers keeping these two things in mind: How can you start saving money as soon as possible? How can we make the transition to sustainable energy, as easy as possible?
