

Solar panels can really make money

Are solar panels a good investment?

Buying solar panels is a long-term investment that should help cut your electricity bills and carbon footprint. But will they pay for themselves and earn you money? Solar panels are often marketed as a way to save money on electricity - and sometimes as a way to make money too.

How do solar panels earn money?

A large portion of potential solar panel earnings comes from the government's generation tariff, which is part of the Feed-In Tariff (FIT) scheme. Under the generation part of this scheme, you receive a fixed rate of income for each kWh of electricity you generate.

How do solar panels save money?

Most of your profit from your solar panels will come from the savings you make. The amount you save will depend on your energy use. Your solar panels will generate power that you can use in your home. Any power you generate stops you from needing to pay another company for energy. If you generate a lot of energy, you could save hundreds of pounds.

Are solar panels a good source of profit?

Now, solar panels are a lot cheaper but might not be a great source of profit. With solar panels, you'll generate your own electricity. You'll make money by reducing the amount that you buy from the National Grid. Included in your profits, you can also make money by selling any that you don't need.

Are solar panels worth it?

The pros of solar panels are immense, and if you can afford the upfront cost they are absolutely worth getting. With solar panels, the average three-bedroom home will save £454 a year on their energy bills. And if you're exporting excess electricity to the grid via the SEG, you'll make an additional £160 per year.

How much do solar panels make a year?

The Energy Saving Trust estimates a typical household based roughly in the middle of the country could make between £220 and £320 a year based on a rate of 12p per kWh (though of course, the better the rate, the more you'll make). If you had solar panels installed before 31 March 2019, it's likely you'll be on a feed-in tariff (FIT).
