

Solar panels cost for schools South Georgia and South Sandwich Islands

How much does a solar system cost in Georgia?

You'll need to install a 11.89 kW solar panel system to cover the average electric bill in Georgia, which will cost you about \$22,185 after the federal tax credit. As long as your federal tax bill is high enough, you can take advantage of the federal investment tax credit (ITC). Compare multiple offers and save up to 20%

What tax credits do solar panels get in Georgia?

The federal solar investment tax credit (ITC) is the biggest factor reducing the cost of going solar in Georgia. If you install a residential solar panel system by the end of 2032, you receive a federal income tax credit equal to 30% of the system's total cost. That includes equipment, labor and permits.

Is Georgia a good state to install solar panels?

With higher than average electricity prices and abundant sunshine, Georgia's a pretty great state for solar energy. It may not have the best local solar incentives, but as a Georgian, you can still take advantage of solar's most valuable incentive, the Federal Tax Credit. Here's what you should know about installing solar panels in the Peach State.

What are the solar incentives in Georgia?

In Georgia, there are two main solar incentives. The first one is the net metering program offered by the state. The second is the generous federal ITC (federal tax credit), which helps with the cost of solar panel installation by reducing it by up to 26%.

What are the largest solar installations in Georgia?

One of the largest solar installations in Georgia is Butler Solar Project 103. As the average cost of solar drops and more large solar projects come online, more and more Georgia residents will be able to use clean, renewable energy in their homes, even without installing rooftop solar. The passage does not provide a complete list, but mentions one notable installation.

How much does solar cost in the Peach State?

Going solar in the Peach State is about 17% more expensive than the national average. The out-of-pocket investment might be higher compared with other states, but net metering and other factors can make the cost substantially lower. The average cost per watt is \$2.95 in Georgia.
