

Solar photovoltaic bracket installation recruitment

Where can I find solar PV installer jobs?

Apply to Solar Pv Installer jobs now hiring on Indeed.com, the world's largest job site.

What is a full-time Solar Installer job description?

This is a full-time, permanent Solar Installer job. You will be working as part of a solar install team, assisting the installers with new solar systems on commercial, residential and new build properties. The role involves inbound/outbound calls, data entry, spreadsheet use, and effective communication amongst the team.

What are the different types of solar jobs?

Manufacturing jobs develop the equipment and tools used in solar power generation, including mirrors and panels, and construction workers are responsible for constructing solar facilities. Solar electricians, plumbers and PV engineers install residential and commercial solar projects.

How can I become a solar panel installer?

To become a solar panel installer, you will need a valid driver's license. Training is provided for those without previous experience. Two to four days of training on the systems used and paperwork is required. Applicants must be local to the postcodes BN, PO, ME, RH, etc. Two years of electrical experience is preferred.

How does solar jobs work?

When a candidate registers with SolarJobs they are given access to a free candidate management system. This allows the candidate to upload and edit their CV, set up job alerts by email that immediately notifies them of suitable job opportunities, add jobs to a wish list and track all the applications that they have made to suitable job postings.
