Where is the 50MW Planet Solar PV project located in Sierra Leone?

The 50MW Planet Solar PV project is split in four different locations in Sierra Leone, consisting of a 12MW power plant under construction in BO/Kenema, a 4.05 MW (DC) power plant to be constructed in Port Loko, a 25MW power plant under construction in Makoth and a 10MW power plant under construction in Kono.

Does Serengeti energy have a 5 MW solar plant in Sierra Leone?

The 5 MW Baoma 1 installation in Sierra Leone. Serengeti Energy has switched on a 5 MW PV plant in Sierra Leone as part of the Baoma 1 installation. The solar PV plant is reportedly the west African country's first independent power project, and was developed by the Kenya-based company and built under a public-private partnership.

How much solar power does Sierra Leone have in 2021?

According to the International Renewable Energy Agency (IRENA), Sierra Leone had a cumulative solar capacity of 4 MW in 2021. This content is protected by copyright and may not be reused.

How much does a 5 MW PV project cost in Sierra Leone?

The 5 MW installation is the first phase of a 25 MW PV project in Yamandu, near Bo town in Sierra Leone. The project will reportedly add approximately 15% to Sierra Leone's total electricity generation capacity. Serengeti expects to start building the project's second phase in 2023. The entire project will require an investment of \$35 million.

What is the first independent solar PV project in West Africa?

The solar PV plant is reportedly the west African country's first independent power project, and was developed by the Kenya-based company and built under a public-private partnership. The 5 MW installation is the first phase of a 25 MW PV project in Yamandu, near Bo town in Sierra Leone.

Does Sierra Leone need more electricity?

The project will add approximately 15% to Sierra Leone's total electricity generation capacity, providing a significant contribution to the need for more electricity in the country. The company expects to commence building the second phase of the project in 2023.

From state-of-the-art solar panels to cutting-edge battery materials and advanced inverters, our product lineup is designed to empower you with sustainable energy solutions. Whether you're looking to harness solar power for your home or business, our products are engineered for performance, reliability, and longevity.

The 5 MW Solar Power plant is the first phase of a 25MW solar PV power project in Yamandu, near Bo town in Sierra Leone. The project will add approximately 15% to Sierra Leone's total electricity generation capacity, providing a significant contribution to the need for more electricity in the country.

The Baoma 1 solar power plant in Sierra Leone has entered commercial operation. The 5 MWp solar plant is the country's first independent power project (IPP), built under a public-private partnership (PPP) between the Sierra Leonean authorities and the renewable energy project developer Serengeti Energy Limited.

[Summary](#)[Location](#)[Overview](#)[Developers](#)[Construction timeline and costs](#)[See also](#)[External links](#)  
Baoma Solar Power Station, is a 25 megawatts (34,000 hp) solar power plant under construction in Sierra Leone. The first phase of this renewable energy infrastructure with generation capacity of 5 MW is operational and was commercially commissioned in December 2022. The second phase with generation capacity of 20 MW is under construction and is expected to come online in the Q4 of 2023. It is reported to be the first grid-connected solar farm in the country, built under a publi...

Three Development Finance Institutions and a renewable fund manager have announced a co-investment of more than \$52 million for Planet Solar, a greenfield 50MW solar power project in Sierra Leone. Planet Solar will be the first large-scale grid-connected solar Independent Power Producer (IPP) project, driving a diversified approach to ...

Planet Solar is the first utility scale solar power project and the first Independent Power Producer (IPP) in Sierra Leone. The project aims to achieve the realization of 50 MW of renewable energy in a country with a huge gap between electricity demand and supply.

The 50MW Planet Solar PV project is split in four different locations in Sierra Leone, consisting of a 12MW power plant under construction in BO/Kenema, a 4.05 MW (DC) power plant to be constructed in Port Loko, a 25MW power plant under construction in Makoth and a 10MW power plant under construction in Kono.
